

## **OFRC Summer 2022 COVID-19 Health and Safety Protocols** **Updated 5/13/22**

*We continue to review and adapt the most up to date State of California, Plumas County Health Department, and American Camping Association guidance, restrictions and standards. All health and safety requirements are subject to change at any time to ensure the health and safety of Oakland Feather River Camp's community of campers and staff. We will provide timely COVID-19 safety updates to registered campers if any changes are made to our safety plans for Summer 2022 as we monitor public health guidelines.*

### **Do campers and staff need to be vaccinated or to provide proof of a negative COVID-19 test before arriving at camp?**

We require that all staff be fully vaccinated and undergo testing. In addition, in order to provide a safe experience for our campers and staff as well as uninterrupted operations throughout the summer, OFRC requires all campers age 12 and over, and all staff, be fully vaccinated with an initial round of COVID-19 vaccinations (2 doses of Pfizer or Moderna, or 1 dose of Johnson and Johnson). Campers age 12 and over who are not fully vaccinated may not attend camp. OFRC requests that proof of vaccination be uploaded via our HIPAA-compliant digital form prior to arrival. Additionally, we strongly recommend that all campers who are eligible for a booster vaccination receive one prior to arrival.

In addition to vaccinations, OFRC requires that all campers present a negative COVID-19 test upon arrival. PCR Lab tests (taken within 48 hours of arrival) and Rapid Antigen tests (taken on the same day as arrival) are both acceptable. Two weeks prior to your arrival, OFRC will notify you of 2-3 brands of approved rapid tests for campers to purchase from local retailers. Due to extremely limited cell phone service, all campers should plan to have the physical test results or a digital screenshot/saved image. You will not be able to access your Department of Health digital vaccine record onsite.

### **Will there be health and safety screenings at camp?**

In addition to showing proof of a negative COVID-19 test prior to arrival, we ask that all families self-screen for COVID-19 symptoms before arrival and each morning of your stay. Should anyone have any symptoms of COVID-19, please let our staff know so that we can assist appropriately.

### **What if someone in our family is diagnosed with COVID-19 before camp?**

Prior to attending OFRC, all campers are required to provide proof of a negative COVID test (see above) in addition to evaluating their health before making the drive to Camp. Campers who experience any symptoms of COVID-19, have tested positive for COVID-19, or who have had close contact with someone who has tested positive five days or fewer prior to arrival should not come to camp. In this instance,

please call the office to change your session or cancel your reservation. Please see our Summer [2022 OFRC Family Camp Registration Change, Cancellation, & Refund Policies](#) for more information.

**What if I exhibit symptoms of and/or test positive for COVID-19 while at camp?**

If you are already at camp and experience symptoms, test positive, or find that you have been a close contact to someone who has tested positive, you should plan to depart camp immediately and seek medical attention from your primary care provider. Families may also seek medical care from the Plumas District Hospital, just outside of camp in the town of Quincy.

**Will we have to wear a mask or face covering while at camp this summer?**

All campers should pack and carry at least two face coverings while at camp. Wearing face coverings may be required in some indoor areas of camp and signage will indicate as such. Additionally there may be situations or activities where a face covering could be necessary. Any changes to public health guidelines will require OFRC to re-evaluate all requirements, so we ask that each camper come prepared with a face covering should it be needed.

**What about social distancing?**

We ask that everyone respect their fellow campers and staff in working to determine mutual comfort level regarding close contact. In addition, anyone who has any symptoms of COVID-19, who has tested positive, or who has been in close contact with someone who has tested positive, should keep six feet of distance from other campers and staff while planning to immediately depart camp.

**How often will the bathrooms, common area, and dining facilities be cleaned?**

We are following all public health guidelines, including the use of more stringent cleaners, and increased intervals of sanitization and cleaning. We have also integrated a 24-hour window between sessions to ensure that all housing units are properly sanitized between sessions.

**Can we travel out of camp during our session?**

Yes, campers will be able to travel to local hiking trails, nearby swimming holes, or to the town of Quincy. Should you leave camp for any reason, we ask that you take the utmost care and precaution regarding health and safety.

**Will the dietary kitchen be available for me to use?**

Yes! The Dietary Kitchen will be available for use for campers who need to cook their own meals, with new sanitization protocols in place.

**What can we do to help this summer?**

We ask that everyone does their part to keep the OFRC community safe this summer. Wear a face covering if requested, follow vaccination and testing requirements, practice excellent hygiene, and monitor symptoms of illness. While there is always some level of risk, if every camper chips in we can lower the risk of community spread significantly. It is only through our combined efforts that we can offer these essential programs that are a summer staple for so many families! Thank you for taking these precautions seriously so that we can all stay safe and well.
